TYPICAL FREESTANDING BATHTUB INSTALLATION PROCEDURE

Baby Boomer™

Corner Walk-In Bathtub

INSTALLATION

WARNING

Electrical appliances (plug, switches, lamps, etc.) must be placed or installed at the minimum safety distance of 60 cm and a height of 230 cm.

Baby Boomer™

Corner/Walk-In Bathtub
INSTALLATION continued

aquatica®
Function, Form & Fashion

1

Take the tub out of the packaging taking care to hold it from the bottom edge of the tub. Lie it near the place where it will be installed.

2

Remove the panel by unscrewing the three retaining screws at the base and sliding it downwards.

3

If not already prepared install the faucet on the bathtub. See the instructions in the faucet box.

Baby Boomer™

Corner Walk-In Bathtub

INSTALLATION continued

4

If not already prepared, assembly the drain and distribution column following the instructions in the box. Connect the distribution to the diverter of the taps

The bathtub stands on 6 adjustable feet. The leveling must be carefully adjusted for the correct functioning of the tub.

WARNING

An incorrect execution of these adjustments may cause a not perfect sealing of the door.

First feet 2 and 5 are raised from the ground. Operate on feet number 1,3,4 and 6 to adjust the level.

6

The tub is set by the factory with a height at the top edge of 96 cm.

At this stage it is not important if the tub does not stand perfectly on the ground, the adjustment will be done later.

7

Place the tub in the installation corner and level it perfectly using the feet 1,3,4 and 6.

CAUTION To level the tub, act only on the feet and not on the threaded rods. It is important that all levelling feet are completely touching the floor and that the level is perfect for the door system to work properly.

8

Once the optimal positioning is achieved, stop the feet by acting on the nut of each foot. Now adjust the feet 2 and 5 to touch the floor, without forcing. Stop the feet by acting on their nut.

WARNING

The feet 2 and 5 must not lift any of the previously adjusted feet otherwise it should compromise the stability of the tub and above all the door system would not work properly.

9

Connect the drain of the tub to the ground predisposition as indicated on the technical details.

Connect the taps to the wall arrangement as indicated on the technical details.

Corner Walk-In Bathtub

INSTALLATION continued

10

All tubs are individually 100% water tested at the factory in order to ensure their perfect functioning. During this phase of the installation it is necessary to test the product in order to verify that all the adjustments made at the factory have been maintained. Due to improper transport or assembly, in some cases there may be leaks.

In case of leaks, in the lower part or along the edge near the closing handle, only with a perfect installation as previously described, it will be possible to act on the tub shape by opening or closing the front side. For this aim, on the front frame, there is a column with an adjustment on the head formed by a plate with threaded rod screwed to the tub and two nuts, one placed on the front and one on the back. This system is able to slightly change the closure.

A) Leak at the base: it will be necessary to screw the rear nut to the column, bringing it against the plate mounted on the tub. Screw the outer nut half a turn at a time until the leak is resolved. Screw the rear nut to the column again. With this operation we have opened the front side

B) Leak on the high side: it will be necessary to unscrew the front column nut half a turn at a time and do the same on the rear nut until the leak is resolved. With this operation we closed the front side

WARNING The adjustments must be minimal in order to avoid creating contrary sealing problems.

At the end of each adjustment, the two nuts must always be tightened to the column.

11

Insert the panel under the tub again, starting from the front side, then under the door and then under the short side.

12

To stop the panel, insert it under the edge of the tub, between the edge itself and the thrust springs. Use the supplied wedges to help you.

Replace the previously removed screws at the base of the panel.

Remove the wedges used as a riser.

Maintenance Instructions

The smooth surface of your Aquatica® Acrylic Bathtub accumulates hardly any dirt, and can be maintained by simply cleaning with a soft cloth, using a mild detergent in water, then wiping over with a dry cloth.

Avoid using abrasive cleansers or solvents, which will cause damage to the surface. Damage caused by use of these products, or any other inappropriate treatment, is not covered by our guarantee.

Инструкция по уходу

Поверхность легко чистится. За счет гладкости грязь к ней не прилипает. Для регулярного ухода используйте мягкую ткань, мыльный раствор и воду. После чистки вытирайте поверхность сухой тканью, которая хорошо впитывает влагу.

Не используйте губки с абразивной поверхностью и агрессивные растворители, которые могут повредить ванну. Повреждения, возникшие вследствие неправильного ухода, не покрываются гарантией.

Installation & Entretien

Cette surface est facile à entretenir et à nettoyer. Sa surface particulièrement lisse, ne retiens que très peu la saleté. Un entretien quotidien nécessite simplement l'utilisation d'un chiffon doux, de l'eau et un peu de savon. Essuyer avec un chiffon sec. L'utilisation de détergents ou de solvants endommageraient cette surface. Les dommages resultants d'un traitement non conforme effectué par l'utilisateur sont exclus de la garantie que nous offrons.

Manuale per il corretto mantenimento

La superficie necessita di pulizia ed accorgimenti per il corretto mantenimento. Una superficie liscia non accumula lo sporco. Usare una spugnetta con del detergente non aggressivo per una pulizia regolare. Asciugare con un panno. Evitare l'uso di solventi o materiali abrasivi: potrebbero rovinare la superficie.

Un danno causato da trattamento inappropriato non verra' coperto dalla garanzia.

Instrucciones para la correcta manutención

La superficie debe de ser limpiada y adecuadamente mantenida. Una superficie lisa no acumula suciedad.

Utilice una esponja con un detergente suave para la limpieza diaria. Seque con un paño.

No utilice disolventes o materiales abrasivos ya que podrían dañar la superficie.

Los daños causados por el tratamiento inadecuado no serán cubiertos por la garantía.
